1. เขียนโปรแกรมสร้าง เพจ จากตารางข้อมูลจากแฟ้ม zipcode โดยใช้

adminite

```
import java.io.*;
import java.lang.*;
class J0702 {
public static void main (String args[]) throws IOException {
int i = 0;
String b,f,h;
String[] fields;
String patternStr = ",";
FileReader finF = new FileReader("f.txt");
BufferedReader binF = new BufferedReader (finF);
FileReader finH = new FileReader("h.txt");
BufferedReader binH = new BufferedReader (finH);
FileReader fin = new FileReader("data.txt");
BufferedReader bin = new BufferedReader (fin);
FileOutputStream fout = new FileOutputStream("data.htm");
BufferedOutputStream bout = new BufferedOutputStream(fout);
PrintStream pout = new PrintStream(bout);
while ((f = binH.readLine()) != null) {pout.println(f);}
pout.println("<body bgcolor=yellow>");
while ((b = bin.readLine()) != null) {
fields = b.split(patternStr);
pout.println("");
pout.println(""+ fields[0]+"");
pout.println(""+fields[1]+"");
pout.println(""+ fields[2]+"");
pout.println(""+fields[3]+"");
pout.println(""+ fields[4]+"");
pout.println("");
i = i + 1;
pout.println("</body>");
while ((h = binF.readLine()) != null) {pout.println(h);}
fin.close();
pout.close();
```

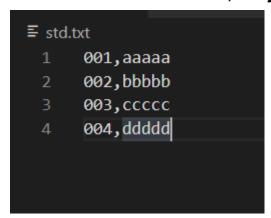

2. สร้างตัวอย่างข้อมูลในแฟ้ม .txt (ของเรา)

จงสร้างแฟ้มนักเรียน : id, name

จงสร้างแฟ้มวิชา : subj, subjname

จงสร้างแฟ้มลงทะเบียน : id, subj, grade (A, B, C)

```
sub.txt

cpsc462,java

cpsc321,hci
cpsc331,php
```

```
≡ grade.txt

     001,cpsc462,A
    001,cpsc321,A
    001,cpsc331,A
 4 002,cpsc462,B
 5 002, cpsc321, B
    002,cpsc331,B
    003,cpsc462,C
    003,cpsc321,C
    003,cpsc331,C
    004,cpsc462,D
10
11 004, cpsc321, D
12
    004,cpsc331,F
13
```

3. เขียนโปรแกรมอ่านข้อมูลทั้ง 3 ตาราง มาเขียนผลลัพธ์ใน adminite จำนวน 3 เพจ ให้สวยงาม

```
import java.io.*;
import java.lang.*;
class x {
public static void main (String args[]) throws IOException {
int i = 0;
String b,f,h;
String[] fields;
String patternStr = ",";
FileReader finF = new FileReader("f.txt");
BufferedReader binF = new BufferedReader (finF);
```

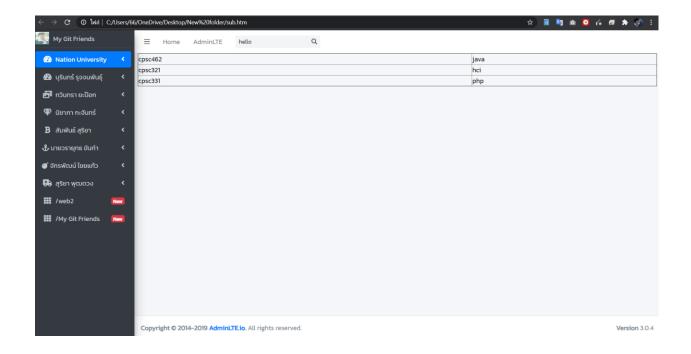

```
FileReader finH = new FileReader("h.txt");
BufferedReader binH = new BufferedReader (finH);
FileReader fin = new FileReader("std.txt");
BufferedReader bin = new BufferedReader (fin);
FileOutputStream fout = new FileOutputStream("std.htm");
BufferedOutputStream bout = new BufferedOutputStream(fout);
PrintStream pout = new PrintStream(bout);
while ((f = binH.readLine()) != null) {pout.println(f);}
pout.println("<body bgcolor=yellow>");
while ((b = bin.readLine()) != null) {
fields = b.split(patternStr);
pout.println("");
pout.println(""+ fields[0]+"");
pout.println(""+fields[1]+"");
pout.println("");
i = i + 1;
pout.println("</body>");
while ((h = binF.readLine()) != null) {pout.println(h);}
fin.close();
pout.close();
 \leftarrow \rightarrow \mathbf{C} \bigcirc 1Wif | C:/Users/66/OneDrive/Desktop/New%20folder/std.htm
                                                                             🖈 🔞 💐 🖄 🔼 💰 👼 🛊 🧬 :

 สำหรับตารางที่ 3 การอ่านแฟ้มลงทะเบียน (ของเรา)
 ให้เพิ่มช่องที่ 4 คือ ระดับคะแนน ในรายงานเว็บเพจ เช่น A ให้พิมพ์เพิ่มว่า 4 และ B ให้พิมพ์เพิ่มว่า 3
 เขียนผลลัพธ์ใน adminite page

```
import java.io.*;
import java.lang.*;
class x {
public static void main (String args[]) throws IOException {
int i = 0;
String b,f,h;
String[] fields;
String patternStr = ",";
FileReader finF = new FileReader("f.txt");
BufferedReader binF = new BufferedReader (finF);
FileReader finH = new FileReader("h.txt");
BufferedReader binH = new BufferedReader (finH);
FileReader fin = new FileReader("grade.txt");
BufferedReader bin = new BufferedReader (fin);
FileOutputStream fout = new FileOutputStream("grade.htm");
BufferedOutputStream bout = new BufferedOutputStream(fout);
PrintStream pout = new PrintStream(bout);
while ((f = binH.readLine()) != null) {pout.println(f);}
pout.println("<body bgcolor=yellow>");
while ((b = bin.readLine()) != null) {
fields = b.split(patternStr);
pout.println("");
pout.println(""+ fields[0]+"");
pout.println(""+fields[1]+"");
pout.println(""+fields[2]+"");
if(fields[2].equals("A")){pout.println(""+"4"+"");}
else if(fields[2].equals("B")){pout.println(""+"3"+"");}
else if(fields[2].equals("C")){pout.println(""+"2"+"");}
else if(fields[2].equals("D")){pout.println(""+"1"+"");}
else {pout.println(""+"0"+"");}
pout.println("");
i = i + 1;
```
